DSG-CANUSA Announces QUICKWRAP

Through close interaction with its customers, DSG-CANUSA, a leading manufacturer of heat shrink products, has developed the QUICKWRAP line of wrap-around products to provide environmental protection and cost savings in the electrical, shipboard, transportation and communications industries. QUICKWRAP Heat-shrinkable Wrap-Around products can deliver savings of up to 80% in retrofit applications.

DSG-CANUSA's QUICKWRAP product line was developed by adapting our industry leading medium and heavy wall products to become wrap-around products. With QUICKWRAP's innovative closure mechanism, the industry leading adhesive performance and split resistance of CFM, CFW, FCFW and CFTV can be applied to retrofit and repair applications where traditional tubing cannot be used.

In typical retrofit and repair situations, users are faced with the choice of using inferior tapes or incurring lengthy downtimes to disconnect and re-apply heat shrink tube. The QUICKWRAP product line allows for quick retrofit protection of connectors, splices, and cable damage combined with the trusted long term sealing and insulating properties of heat shrink tubing.

In telecom and utility applications, retrofit protection of connectors requires a lengthy and disruptive disconnection process to re-apply the heat shrink. By using QUICKWRAP, operators have been able to reduce their labor costs by 80% but more importantly avoid disruptions to their service.

The QUICKWRAP product has infinite uses. Some typical cost saving applications include:

- CFM QUICKWRAP is a medium wall wrap-around that can be applied with a heat gun. CFM QUICKWRAP can be applied in many applications in the transportation sector to protect or repair wire harnesses, cables and hoses (for gauges 4AWG and larger).
- CFW QUICKWRAP uses a heavy wall jacket for rugged retrofit work in the electrical industry.
- FCFW QUICKWRAP features a flame retardant jacket that is ideal for retrofit production in shipboard applications.
- CFTV QUICKWRAP uses a clean strippable adhesive to meet CATV industry standards. Thermo chromatic paint lines on the jacket change colour to signal a waterproof seal.

Please contact DSG-CANUSA at 1-800-422-6872 or visit www.dsgcanusa.com for more information on the QUICKWRAP product line.

DSG-Canusa is the complete source for heat shrink tubing products and heat shrinkable related technology. Using heat shrink tubing and related heat shrinkable technology, DSG-Canusa has provided electrical and mechanical insulation solutions for more than 35 years worldwide.
